## Summary

---

Web developer with strong verbal and written communication skills and solid analytical skills for writing web-based solutions. A self-starter who is able to work independently or work in a team to a collaborative solution.

## Work Experience

---

### ***Full Stack Mobile Developer,***

Kudos Health,

Innovation Center, Ash Lane, Sligo,

2021 – Current

I wanted to learn more about mobile development and accepted a job with Kudos Health. They have a mobile app build with React Native and an AWS backend, two areas I wished to learn more about. I was responsible for developing core features such as the QR code scanner, statistics views for the end-users and analytics views for HR. I was also responsible for more general work like bug fixes, unit testing and documentation.

### ***Full Stack Developer,***

Space Food,

Remote, Sligo,

Jan – Jul 2021

Space Food was a VR App, designed to provide restaurants with a VR menu. The idea was we would take pictures of a restaurants food and then create VR renders from them. A customer could download an app ahead of time and view a 3D image of the food before they ordered. I was responsible for designing CRUD APIs for the website using AWS and Auth0. I was responsible for designing unit tests and maintaining legacy code.

***Business Owner,***

Gear Free,

2019 – Current

I am a registered business owner currently working on a software as a service application. The aim is to streamline time management for companies in the retail and catering industries. It is an MVC app with a SQL database hosted on Azure, utilizing modern software design principles with a large emphasis on mobile first usage for its end users. However due to financial constraints I have had to park this for the time being and pursue a new working opportunity in a progressive company.

***General Operative,***

Mullins Food Store,

Pearse Road, Co. Sligo,

July - December 2019

As a general operative my responsibilities require me to be punctual, have attention to detail, provide customer fulfillment and provide knowledge of the local area.

***Front-End Developer,***

Champ Cloud,

Innovation Centre, Ash Lane, Sligo

Jun – Dec 2014

I was a front-end developer in an internal development team, tasked with modernizing the companies CRM user interface using ASP.NET Web Forms and creating an administrator dashboard to display relevant data to clients.

## **Education**

---
